

TROJAN SECURITY

TROJAN TELEGRAM APPLICATION

To receive signals via Telegram Bot and to test your alarm, please follow the instructions that follow:

1. Download the free Telegram App from your Playstore;
2. Open Telegram on your phone;
3. Top right hand click on the **search** icon;
4. Search **TrojanSecurity_bot**;
5. Enter on **TrojanSecurity_bot**;
6. When open, click on **Start** at bottom;
7. Press **Send Contact Info**;
8. Enter on **Share Contact** – you number will automatically be linked to your profile and you will now be receiving notifications via Telegram instead of by SMS;
9. Service Options:
 - /PANIC** – Emergency
 - /TEST** – Test Alarm System
 - /HELP** – Helpful information
10. To test your Alarm System, enter **/TEST**. You will receive a message **“System on Test”** – you can now proceed testing your Alarm System and should receive notifications of all signals tested on your Telegram App. However, should you not receive any signals back, please log a Technical Callout with Trojan's Technical Department on 011 792 0738;
11. For any further assistance, please e-mail: operations@trojansecurity.co.za
